SUMMARY

Dynamic Senior Software Engineer with 8 years of experience in high-scale processing and optimization. Led large-scale workflows, implementing robust algorithms that increased efficiency by 80%, and achieved zero database deployment failures using automation. Seeking opportunities to drive innovative solutions through expertise in Java, Python, and NLP in agile environments.

EXPERIENCE

Senior Software Engineer

Verantos

January 2022 – Present, Pune, Maharashtra

- Utilizing skills in Java, Python, Postgres, NLP, AWS, Shell script to deliver high-quality code and meet project goals.
- Optimized large-scale file processing workflows upwards of 100M notes by implementing efficient algorithms and enhancing feature modules using Java and Python for robust NLP tasks including de-identification and profiling.
- Parallelized shell scripts using multithreading to quicken the process by 80%.
- Performed automation of deploying database related changes with code using shell scripts and then implemented Alembic tool for database versioning which reduced basic database sanity check failures of last 10 sprints to 0.
- Provided detailed system design input for pipeline enhancements, improving flexibility and maintainability in collaboration with cross-functional partners using AWS and Postgres.
- Spearheaded end-to-end project delivery by independently managing all phases from initial design through deployment, consistently surpassing scheduled timelines in a fast-paced environment.

Senior Software Engineer

Edgeverve

July 2018 – January 2022, Pune, Maharashtra

- Implemented banking functionalities by interpreting client specifications and applying Java, SQL, and modern web technologies for high-availability systems.
- Developed FASTag Issuance and Recharge – Recorded 2M issuance within first month – highest in country, ICICI bank became the market leader with 36% market share in FY21).
- Virtual Debit Card (More than 50k unique customer visits within first quarter), Merchant Integrations, Dashboard Revamp.
- Loan Moratorium (increased customer opting to 30% during COVID-19 quarter of April – June 2020).
- Managed a sub team of 4 developers during their onboarding and led the Scrum meeting following agile practices.
- Integrated diverse technologies within the Java ecosystem and modern frontend frameworks to deliver seamless cloud-based banking solutions tailored for high-availability enterprise environments.

EDUCATION

Bachelors of Engineering, CSE

Birla Institute of Technology, Mesra • Ranchi, Jharkhand • 2018 • 6.79

SKILLS

Backend: Java, Python, SQL, NLP, REST APIs, JSON, Maven, Jira, Alembic, PostgreSQL, Shell, Alembic, Junit, HHD

CloudOps: AWS, Azure, GCP, CI/CD, Jenkins, Kubernetes, Lambda, EC2, S3, EFS

Architecture: Data modelling, High level design, Low level design, Optimization, Multithreading
